

**METHOD AND APPARATUS FOR PARITIAL INTERFERENCE
CANCELLATION IN A COMMUNICATION SYSTEM**

Abstract of the Disclosure

- 5 A method of partial interference cancellation of a received signal including
a first data component and a second data component includes the steps of
 determining a characteristic of the communication channel, estimating a
factor based upon the characteristic, using the factor to cancel the second data
component from the signal, and recovering the first data component from the
10 signal.
